Valon Haslem

1808 38th Street South, Great Falls, MT 59405 | valondhaslem@gmail.com | 406-403-4315 | vhaslem.github.io

EDUCATION

Oregon State University *Fall 2026 - Present*
Master of Science in Statistics

Gonzaga University *Fall 2022 - Spring 2026*
Bachelor of Science in Applied Mathematics & Economics, Honors
Summa Cum Laude | President's List | **President**, Society of Industrial and Applied Mathematics | **President**, Pi Mu Epsilon | Phi Beta Kappa | Omicron Delta Epsilon
Awards: Carsrud Award, Outstanding Junior in Mathematics, Overbay Service Award

PROFESSIONAL EXPERIENCE

Statistics Research Assistant *January 2025 - May 2026*
UW School of Medicine - Gonzaga University Health Partnership *Spokane, WA*
- Aided statistical methods implementation in R for nursing anesthesiology student projects.
- Built ordinal logistic regression for anesthesiology research on post-pulmonary conditions.
- Conducted matplotlib data visualization on AIBOT medical student study aide dataset.
- Submitted paper on novel development and comparison of ventilatory threshold calculation.
- Assisted in statistical methods and visuals for heat glucose control publication.

Mathematics Research Assistant *August 2023 - May 2026*
Gonzaga University Math Department *Spokane, WA*
- Collaborated on multiple math research projects in combinatorial game theory.
- Directed a project on novel knot theory invariants and unknotting number bounds.
- Wrote honors thesis on stochastic models to predict linguistic laws and language trends.
- Presented work at JMM 2025, PiMUC 2024, and multiple other conferences.

Mathematics Tutor *January 2024 – May 2026*
Gonzaga University Math Department *Spokane, WA*
- Tutoring 20 students per week in calculus, statistics, economics, and computer science.
- Enhanced soft skills, collaborative abilities, and teaching methodologies.

PROJECTS

Comparative Analysis of Survival Models on Chronic Myeloid Leukemia Treatments
- Implemented Proportional Hazards, LASSO, and Survival Random Forest Model on CIBMTR data evaluating allogeneic hematopoietic cell transplantation on leukemia patients.
- Used R tidyverse for data cleaning, covariate selection, model packages, and visualization.
- Calculated risk scores, concordance indexes, and cross-validated Brier scores.

Neural Networks on FIFA Value and Position
- Used TensorFlow and SKLearn to implement multilabel neural networks (Loss = 0.15, Accuracy = 0.94) to predict player position and regression neural networks (Loss = 0.11, MAE = 0.156) to predict player value.

US News and World Report College Rankings Analysis
- Evaluated College Scorecard data in R tidyverse to identify metrics for 230 US universities.
- Used 3-means classification to cluster different universities and design new classifications.
- Implemented optimal transport multivariate rank method to construct new ranking.

Options Trading Interface
- Automated data pipeline on 50 NYSE tickers and FRED data using Google Cloud Platform.
- Scheduled multiple JSON to MySQL data pulls daily for python preprocessing.
- Calculated and evaluated theoretical/empirical options prices using linear regression.

TECHNICAL SKILLS

Python | R | SQL | Google Cloud Platform | Microsoft Office | MATLAB | C++
